About ObjectOrb

Founded in 1998, ObjectOrb is an IT Products and Services Company based in Bangalore, India. We offer products and services primarily to providers, payers and Healthcare IT companies, and other industry verticals.

Since inception, ObjectOrb has been a reliable offshore partner for product development companies in the U.S. and Europe. With our proven offshore development model, we have built world-class products for customers. Many of these projects involve full-life cycle and a long-term relationship ranging from 1-5 years. In most cases, we have been the sole development partner for our customers.

Features

+ *Transfer of Enrollment data*

IndiaVima enables faster exchange of enrollment data between the various stakeholders viz., Employers, Brokers, Insurance companies and TPAs.

+ *Online RFPs*

Employers/Brokers can request proposal from different insurance companies.

+ *Online Policy sales*

PIOs can send online policy proposals, which enhances policy sales for insurance companies.

+ *Access to Policy and Beneficiary data*

Through IndiaVima, TPAs can access Policy information and Beneficiary data online as soon as the Insurance company activates or endorses the policy. TPAs can generate cards quickly and accurately using the Beneficiary data.

+ *Reports*

Head Office and Regional Offices can view various reports related to their concerned Branch and Divisional Offices.

+ *Reduce Cost and Errors*

Since data is available in electronic format, operating costs incurred in stationery paper, printing, faxing and courier can be reduced. Exchanging data electronically also reduces errors and delays in transferring data.

+ *CD Balance*

Shows real time status of cash deposit balance for each employer.

+ *Premium Calculation*

IndiaVima provides a highly generic premium calculator, which can be used to calculate the premium for any number of beneficiaries quickly and accurately.

+ *Proposal Comparison*

Allows Employers to compare proposals in terms of their benefits, features and premium amounts for better decision-making.

+ *Notification*

Events such as Policy activation and Endorsements are notified through Fax or email to Employer and TPA.

+ *Claims Analytics*

Insurance companies can view the performance of the policies issued by them in terms of claims, claims ratio, trends according to disease codes, hospitals, employers, industry sector, age group, etc

+ *Audits*

All business transactions are tracked, which can be used for audit purposes.

+ *Reconciliation*

TPA transactions can be reconciled by Regional Office easily.

+ *Online Mediclaim*

Credit Card & Account holders can purchase Mediclaim Policies online
